SUBJECT: BLUE SPRUCE CO. SITE, RARITAN CENTER, EDISON

Dear Mr. Grun:

Enclosed are copies of the EPA Dioxin Survey and the results of sampling conducted by our bureau on May 9, 1985, for the Raritan Center, Blue Spruce Site. As indicated by the also enclosed memorandum, the results for volatiles and base neutral/acid extractables were rejected by QA/QC due to exceedence of accepted holding times. I could not find any information that would indicate the site has been resampled. The sampling results for total phenols, cyanide, metals, PCB's and pesticides, which are probably the main health and environmental concerns, were accepted.

If you have any questions, please feel free to contact me at 609-984-3239.

Sincerely,

Robert Raisch
